portfolio

Professional Summary

Full Stack Developer with hands-on experience building real-time dashboards, REST APIs, and scalable web applications using React.js, Node.js, and modern databases. Proven ability to reduce UI lag, optimize API performance, and deliver production-grade systems from design to deployment. Strong foundation in client-server architecture, event-driven systems, and cross-functional collaboration in Agile teams. Currently pursuing B.Tech in Artificial Intelligence & Data Science (GPA: 9.75), applying machine learning fundamentals to practical full-stack solutions.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Responsive UI Design, DOM Manipulation, Performance Optimization

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Middleware, MVC Architecture

Databases: MySQL, MongoDB (Schema Design, Query Optimization, Indexing), SQL

Real-Time & Systems: WebSockets (Socket.io), Real-Time Data Pipelines, Event-Driven Architecture, Client-Server Architecture

Languages: JavaScript (ES6+), TypeScript, SQL, Java, Python, HTML5, CSS3

Tools & Platforms: Git, GitHub, Postman, JIRA, Chrome DevTools, Docker (Basic)

Concepts: OOP, Data Structures, Asynchronous Programming, REST Architecture, Agile/Scrum, ROS, Code Reviews

AI/ML & Certifications: Machine Learning (Infosys), Data Science (IBM), Azure AI Fundamentals

Professional Experience

Eric Robotics (Premier Seals Pvt Ltd)

September 2025 – Present

Full Stack Developer Intern

Pune, Maharashtra, India

- Built 6+ production-grade real-time dashboards using scalable architecture and live data pipelines, delivering monitoring solutions across UI, backend, and hardware teams
- Developed a drag-and-drop dashboard builder enabling modular UI configuration, significantly improving operator workflow and reducing setup time for non-technical users
- Engineered a robot control interface with low-latency state updates, implementing backend validation logic to ensure safe command execution and prevent erroneous robot operations
- Integrated video streaming APIs for real-time camera monitoring, enabling live robot feed visualization within the dashboard without additional infrastructure
- Reduced UI lag by **25%** through targeted rendering optimizations and improved API efficiency via optimized request batching and response handling
- Collaborated across UI, backend, and hardware engineering teams in an Agile environment, participating in sprint planning, code reviews, and cross-functional feature delivery

Zest India IT Services

March 2025 – June 2025

Software Trainee

Pune, Maharashtra, India

- Built responsive, accessible UI components using React.js and integrated RESTful APIs with proper error handling, loading states, and edge case management
- Improved application load time by **20%** through frontend performance optimizations including lazy loading, code splitting, and efficient asset management
- Debugged and resolved UI/UX issues using Chrome DevTools, reducing reported defect count and improving production stability
- Worked in Agile development teams using Git for version control and JIRA for sprint tracking, consistently delivering features within sprint deadlines

Artiset

January 2024 – February 2024

Software Intern

Pune, Maharashtra, India

- Designed end-to-end application workflows and interactive UI prototypes, translating product requirements into intuitive user experiences for early-stage stakeholder validation
- Improved navigation efficiency by **30%** through redesigning information architecture and user flow, contributing directly to core product design decisions
- Collaborated with the founding team to shape early product direction, bridging design thinking and technical implementation

Projects

Dynamic Dashboard Builder | *Node.js, Express, MySQL*

2025

- Architected a fully modular dashboard system with dynamic, configurable widgets enabling users to build and save custom layouts without developer intervention
- Implemented real-time data binding using an event-driven design pattern, ensuring live widget updates with minimal latency across concurrent users
- Designed and documented scalable backend REST APIs for configuration management, supporting CRUD operations with optimized MySQL queries

Real-Time Control Dashboard | *React.js, Node.js, WebSockets*

2025

- Developed a real-time monitoring and control system with low-latency WebSocket communication, enabling instant state reflection across all connected clients
- Implemented bidirectional state synchronization between frontend and backend, ensuring consistency and preventing stale data in high-frequency update scenarios

Task Management System | *React.js, Node.js, MongoDB*

2024

- Built a Trello-like task management application with drag-and-drop functionality, role-based access control, and real-time updates for team collaboration
- Designed RESTful APIs with JWT authentication and optimized MongoDB schema with indexing strategies to support efficient querying at scale

Real-Time Chat Application | *Socket.io, React.js, Node.js*

2024

- Implemented full-duplex WebSocket-based messaging using Socket.io, supporting real-time delivery, read receipts, and efficient handling of concurrent users
- Optimized event emission and room management to maintain low latency and stable performance under high message throughput

Education

Dr. D.Y. Patil School of Science and Technology

2022 – 2026

Bachelor of Technology (B.Tech) – Artificial Intelligence & Data Science

Pune, India

- GPA: 9.75/ 10.0

Certifications

Machine Learning – Infosys Springboard | Data Science – IBM | Azure AI Fundamentals – Microsoft

Languages

English (Fluent) | Hindi (Native) | Marathi (Proficient) | German (Beginner)
